

SPCI CONVENTION 2020

The Swedish King Carl XVI Gustaf at the inauguration of the pulp mill at SCA Östrand 2019.

Factory of the future – controlling the process

The Control Systems conference is held every two years and is the preeminent conference in the area of process measurement and control and systems engineering for the pulp and paper industry. In 2020 the conference will be held at the same time and place as the SPCI 2020 Convention in Stockholm.

The conference attracts presenters and attendees from all major pulp and paper producing countries, so this will be your best opportunity to network with experts from all around the world and to learn more about important ongoing work in the field.

The conference will focus towards the practical use of *new and emerging technologies* and on *research* on the brink of implementation.

We encourage you to submit papers for the conference concerning relevant topics, such as:

- ▶ Measurement and control of relevant industrial processes
- ▶ Novel on-line sensors and sensing techniques
- ▶ Methods and tools for improving energy efficiency
- ▶ Process and control performance assessment
- ▶ Operator decision support and augmentation systems
- ▶ Production management and optimisation
- ▶ Process data analysis
- ▶ Modelling and simulation
- ▶ Measurement and control in biorefinery and bioenergy processes
- ▶ Applications of Soft sensors and Multivariate statistics in process control

We will consider technically sound papers on any topic concerning pulp and paper control systems and related subjects that can potentially benefit pulp and paper producers, with a specific focus on experiences from real mill implementations.

Important dates

- ▶ Authors interested in presenting a paper at the conference should submit an abstract by mail to marina.asp@spci.se by **January 15, 2020**.
- ▶ Notification of acceptance will be distributed by **February 2020**.
- ▶ The final full text manuscript must be provided by **April 8 2020**.
The submitted abstract should briefly describe the objectives, results and conclusions on maximum 2 pages. If you have any questions, please e-mail Marina Asp, marina.asp@spci.se.

Program finalisation

The final scientific content, invited lectures, panels, and sessions for the conference will be developed with the assistance of the International Program Committee.

The current official information is published on the conference web site www.spci.se

Venue: Stockholm Waterfront Congress Centre, Stockholm, Sweden

Conference dates

- May 5** – Welcome reception at 19.00
- May 6** – Conference and exhibition
- May 6** – Conference Dinner
- May 7** – Conference and exhibition

We look forward to welcoming you to Control Systems 2020, May 6–7, in Stockholm, Sweden.
